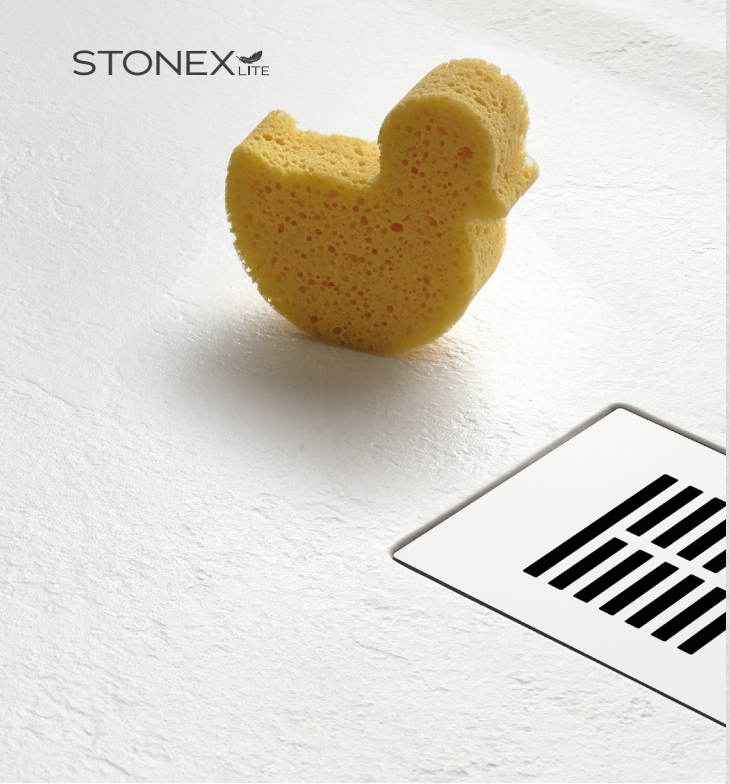
STONEX LITE



Stonex Lite is a low-density composite material, made from mineral fillers and high-quality polyester resin. Featuring a textured finish inspired by natural stone, **Stonex Lite** shower trays offer excellent slip resistance for enhanced safety and outstanding durability, all in a remarkably lightweight material.

LIGHTER WEIGHT
SAME TEXTURE
LOWER ENVIRONMENTAL IMPACT

The new **Stonex Lite** formula **reduces the material's weight by approximately 30%** through the incorporation of a low-density mineral filler. This upgrade makes our products **easier to transport, handle and install**, while helping to **reduce the environmental impact** associated with transportation.

Despite the significant weight reduction, **performance, strength and durability remain unchanged**, in accordance with **EN 14527**. The texture and surface appearance are also preserved, maintaining the distinctive characteristics of **Stonex®**.

The reduced weight helps lower **logistics costs** and **CO_2 emissions** during transportation.

Thanks to their lighter structure, **Stonex Lite** shower trays are easier to transport and install.

Stonex Lite shower trays reduce the risk of damage during on-site handling, **helping to protect both the shower tray and surrounding surfaces.**
